

ANFOMAX

Ammonium Nitrate and Fuel Oil

DESCRIPTION

ANFOMAX is a high quality packaged ANFO used in open pit and underground mining operations as well as quarries and construction. High quality technical grade ammonium nitrate prill ensures proper fuel absorption, leading to a consistent, high energy product. ANFOMAX is packaged in 50lb bags for use in dry conditions.

ANFOMAX TECHNICAL CHARACTERISTICS

AN:Fuel Ratio	94:6
Nominal Density (g/cc)	0.84± 3%
Detonation Velocity (m/s)	3,600 to 4,100
Detonation Pressure (kbar)	28
Gas Volume (l/kg)	1,050
Transport and UN Numbers	UN 0331 Class 1 Division 5 1.5

ANFOMAX RECOMMENDED USES

ANFOMAX is used in the mining, quarries, and construction market as a general blasting agent. ANFOMAX does not have water resistance and should not be used in wet or damp conditions.

ANFOMAX MANUFACTURING

ANFOMAX is manufactured in Rush Valley, Utah near Salt Lake City, Utah.
